

Switch Cloud

Your cloud for special demands – flexible, secure and powerful.

Switch Cloud is designed specifically for the Education, Research, and Innovation (ERI) sectors, delivering security, flexibility, and performance tailored for critical workloads.

Switch Cloud upholds Switzerland's rigorous standards for data sovereignty, ensuring your data remains within Swiss borders under Switch's full governance. Running on Green's ISO-certified data centres, Switch Cloud provides a secure, sustainable infrastructure to support your work.

Key Benefits at a Glance

Co-creation

With expert support from Switch, you become part of a unique cooperative model. This collaboration allows you to bring forward your challenges, helping to shape and refine the cloud solution to meet evolving needs.

Competence

Technical excellence and expertise provide you with reliable, high-quality services, including Compute, Storage, Kubernetes, Secrets Management and more.

Security

With encryption at rest and in transit, a secure vault system, network isolation, and hardware security modules, Switch Cloud provides robust data protection. This focus on security is especially valuable for organisations managing sensitive or confidential information.

Governance

Fully controlled by Switch, developed and operated in ISO-certified facilities, Switch Cloud aligns with Switzerland's strict data protection standards, providing trusted oversight and operational integrity.

Performance

Switch Cloud's enterprise-grade infrastructure, housed in high-availability data centres, scales seamlessly to deliver consistent performance for even the most demanding applications.

Consulting

A team of experienced Switch specialists is available to advise and support you.

Contact us today to learn more about how Switch Cloud can empower your projects with reliable, secure, and flexible cloud solutions.
