Security Engagement Kit

Getting employees to engage with security?
The Security Engagement Kit is built for exactly that. Research-backed. Customisable. Supported by experts from initial assessment to regular evaluation.

The Security Engagement Kit is a ready-to-run, research-backed programme that simplifies complexity and drives behaviour change – so your people understand security risks and know how to mitigate them.

It delivers an impactful, easy-to-budget solution that lets security leaders focus on their core responsibilities. The programme equips employees with the skills, tools, and motivation to apply secure practices in work and daily life.

- Customisable modules
- Research-backed
- Multi-format engagement
- Support from our experts
- Easy-to-budget solution

A flexible programme designed around your needs

Our solution combines five stations with a range of customisable modules, delivered through a yearly subscription.

I Kick-off | Plan

Assess your needs, involve your stakeholders and define your path.

II Inform & Train | Educate

Equip employees and management with the relevant skills to protect your organisation.

III Security Adventures | Motivate

Give security a reputation boost with a fun team experience and create lasting engagement.

IV Tools & Processes | Enable

Make secure behaviour easy by providing supportive tools and processes.

V Evaluation | Evaluate

Evaluate security knowledge, attitudes, and confidence across your organisation and measure your programme's impact.
